To Whom It May Concern:

I have known Tombleson Construction since my early days here at California State University Monterey Bay, starting in March 1997, working as a consulting Project Manager, on various campus projects.

Through the years, Tombleson has gained an enviable reputation on campus for being a very responsible, reliable and honest contractor to work with. They have also earned the respect by both the Facilities and Foundation managers for their on going service and expertise in their areas.

Tombleson's work has always been completed in a very professional and timely manner, as evidenced by some of their projects (Campus Service Center & Alumni Visitor Center) going on to win awards and recognition from the American Institute of Architects and other industry professionals.

Speaking on behalf of my department, working with Mike Locke and Tombleson Construction has been a very positive experience and we look forward to a long term relationship with them to continue the development of campus.

If there are any questions, please feel free to contact me directly.

Sincerely,

Robin Katsuki, AIA/NCARB
Director Design and Construction
