To Whom It May Concern:

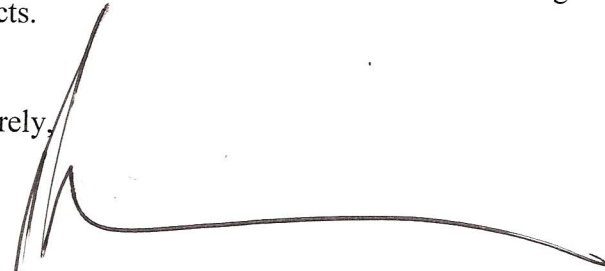

I have known and worked with Don and Steve Locke of Tombleson Inc. for more than 25 years. They consistently bid our school and governmental projects and are often the successful low bidder.

Over this time they have been the General Contractor for over 40 or 50 of our jobs with combined construction valuation of approximately \$70 million.

These projects include K-12 school modernization, new school buildings and governmental buildings. All these projects were completed in substantial conformance with the contract documents without any material disputes or extraordinary change orders.

We have not experienced any significant failures, non-performance or warranty issues on any projects built by Tombleson. I believe them to be a capable and professional organization with broad experience and knowledge in the construction of public works projects.

Sincerely,

Peter Kasavan, AIA
