During both of these contracts we have found the Tombleson organization and their people to be exceptional in their abilities to meet our needs and expectations related to the costs, the quality work itself and the product received.

We have been very pleased and satisfied especially with Steve Locke, Don Locke and Mike Locke. They each have demonstrated a sincere interest in helping us achieve the needed changes in the building necessary to serve our clients who are afflicted with senile dementia, Alzheimer's Disease and other types of health impairments. This center keeps these folks at home with loved ones instead of being institutionalized.

We appreciate our friends at Tombleson and would certainly consider them again with other construction opportunities.

Sincerely,

Ann Love McPherson
