RE: Greenfield Library for the Monterey County Free Library
Administrative Offices and New Truck Scales for the
Monterey Regional Waste Management District

Dear Steve,

It has been our pleasure to have worked with you and your company during the construction of Greenfield Library for the Monterey County Free Library and Administrative Offices and New Truck Scales for the Monterey Regional Waste Management District. This recently completed project should surely be considered a success because of the outstanding way the owner, our office and your firm were able to work together and accomplish a building within budget, on time and exceeding the expectations of all. I am pleased to report that our client is most pleased with the project and you deserve a great share of that opinion.

As you know, the construction industry is constantly changing and we all have had to change our way of operating and doing business in order to be competitive. However, it is those that are still able to provide a high degree of service that will hopefully stand the test of time and your work has certainly demonstrated that. We appreciate you and your staff's willingness to work with us as a team. Your willingness to be flexible and fair, your desire to be responsible and demand that of your subcontractors and your ability to treat our clients with the utmost respect is appreciated and we look forward to be involved in another project with you as soon as possible.

We would appreciate any feedback that you might have regarding the work and our participation in the construction process. Again, we thank you for your extreme professionalism and we anticipate a productive future together in other work.

Sincerely,

Paul W. Davis, AIA
Architect
